

Customized Marketing Material . . .

What's it cost - How it works:

1) Costs will vary depending on the type of material you may require. If wanting any of the template examples on this website or other examples in our files, there would be **no charge** for logo/matching borders/identity, address insertion or any other type of modification if accompanied with a minimum printing order of just 100 pieces.

“Starting from scratch” - such as joint realtor listing flyers can quite often require an inordinate amount of time, will be billed at our reduced fee of \$35.00/hour. These type of items usually require 15 - 20 minutes while others may require up to an hour or more.

2) The Mortgage Marketing website is not geared like most other internet companies. It's primary function is that of an *idea library*. Practically all of the examples that are currently illustrated have been designed and produced for a particular purpose and are in use today by many loan originators. There are many more variations and other examples available.

“Customized” means that every piece of material will have your own identity. This includes your company logo, your picture, contact numbers, appropriate colors and your message exactly the way you want it. Nothing is ever preprinted and stacked on a self as with many other companies in our line of business.

Just email us with your requests or tell us what you're looking for and we'll get things started!
